NOVOSIBIRSK AIRFRAME PLANT NO. 153

25X1D

The Novosibirsk Airframe Plant No. 153 was first observed on photography on TALENT [REDACTED] and contained at that time approximately 2,446,125 square feet of floorspace. A comparison of the TALENT photography with that from KEYHOLE [REDACTED] reveals additions totaling approximately 798,950 square feet of floorspace, bringing the present total of floorspace to 3,245,075 square feet.

25X1D

The additions include a final assembly hall (Item 1, Figure 2 and Table I), a maintenance hanger (Item 7), a workshop/machine shop (Item 10) and a subassembly/machine shop (Item 15). Construction of minor buildings and additions to existing facilities accounted for the remaining 97,200 square feet of new construction.

25X1D

The final assembly hall was in an early stage of construction in [REDACTED] and was complete by [REDACTED]. The maintenance hanger and the workshop/machine shop were erected between [REDACTED]. Construction of the subassembly/machine shop was observed in [REDACTED] and was completed by [REDACTED]. Most of the miscellaneous expansion occurred between [REDACTED] and [REDACTED].

25X1D

Table I contains the description and dimensions of the major buildings comprising airframe plant no. 153. All measurements were made by the NPIC Technical Intelligence Division, with the exception of the heights of those numbered buildings marked with an asterisk. These height measurements were made by the CIA/IAD analyst and are only approximate. Twenty-five per cent of the height measurements of the smaller unnumbered buildings grouped under the heading of "Others" were computed by the CIA/IAD analyst and are only approximate.

The transportation facilities at the plant include approximately 22,600 linear feet of concrete surfaced roads, averaging [REDACTED] in width.
